

Alycol Cool Ready -35

coolant, ready to use

Alycol Cool Ready -35 is a pink coloured ready to use monoethylene-glycol based coolant liquid, containing a corrosion inhibitor additive. It is free from nitrites, amines, borates, silicates and phosphates, and is suitable for filling the cooling systems of internal combustion engines. Alycol Cool Ready -35 can be mixed with other monoethylene-glycol and monopropylene-glycol based antifreeze coolants without limitation.

Application

Cooling systems of passenger and commercial vehicles, agricultural and construction machines

Cooling systems containing cast iron, aluminium and copper parts

Features and benefits

Good corrosion protection

Forms a stable protective film on the inner surface of the cooling system to ensure a long lifetime

Application specific composition

Protection against cavitation and sludge sedimentation

Compatible with construction materials

There's no damage to the plastic and rubber parts of the cooling system

Specifications and approvals

BS 6580:2010
ASTM D 3306

Properties

Properties	Typical values
Appearance	pink
Density at 15°C [g/cm ³]	1,069
pH value	7,6
Freezing point [°C]	-36
Alkalinity [ml 0,1M HCl/10 ml]	1,4
Refractive index at 20 °C	1,384
Content of chlorid [mg/kg]	<10
Content of sulphate [mg/kg]	<10

The characteristics in table are typical values of the product and do not constitute a specification.

Storage and handling instructions

Should be stored in its original packaging with airproof sealing, separately from foods, in a place protected against water and sunshine, locked away from children.

In the original container under the recommended storage conditions: 60 months

Recommended storage temperature: -35°C - +30°C
