

TECHNICAL DATA SHEET / DETCHEM SOL

Characteristics: DETCHEM SOL is a solvent degreaser emulsion and is formulated with inverted hydrocarbon/water emulsion technologies. Unlike pure solvent degreasers, DETCHEM SOL emulsifies in water and reduces the risk of low flashpoint applications. Water emulsion allows oil and grease to be rinsed off and drained to the oil separation facility where it gets removed from the water to minimize the environmental impact. DETCHEM SOL can be used for cleaning all engine, drivetrain and chassis parts and components.

Features:

- OIL AND GREASE SEPARATION
- STRONG SOLVENT CLEANING PROPERTIES
- ANTI-RUST PROPERTIES
- EMULSIFIES IN WATER
- HIGH FLASH POINT
- MINIMAL ENVIRONMENTAL IMPACT

Directions of use:

Apply DETCHEM SOL by spray or brush directly onto the dirty surface and allow soaking and activation period. The length of soaking will determine the degree of penetration. Dilute with water for less severe applications

Transport:

Flammable
Shelf life: 6 months
Harmful to skin and eyes (Refer to MSDS)
Not for human consumption (Refer to MSDS)
